Arm & Hammer
Animal Nutrition

Uncompromised Safety and Quality

For decades Arm & Hammer Animal Nutrition has provided safe, high-quality feed ingredients designed to help improve herd productivity and profitability. Even during times of rising input costs or low milk prices, we've worked to maintain the highest integrity and quality of our feed ingredients, making sure they meet customer expectations every time.

Dairy Industry Dedication

Arm & Hammer Animal Nutrition is committed to:

- Providing high-quality, research-proven feed ingredients.
- Maintaining the highest feed ingredient integrity, regardless of input costs.
- Doing our part to develop products to help improve dairy cow productivity.
- Ensuring product performance is backed by published research.

Made in the U.S.A.

All Arm & Hammer Animal Nutrition products are manufactured in the United States under strict regulatory guidelines for ultimate satisfaction and peace of mind.

Industry-Recognized Certifications

We've taken our commitment one step further through obtaining industry-recognized certifications to promote quality standards and sustain producer trust:

- Our manufacturing facilities in Madera, Calif., Oskaloosa, Iowa, and Old Fort, Ohio, hold valid certifications under both the Facility Certification Institute (FCI) and American Feed Industry Association (AFIA) Safe Feed/Safe Food certification programs.
- Our manufacturing facilities in Green River, Wyo., and Old Fort, Ohio, are International Organization for Standardization (ISO) 9002 accredited and certified.
- Annual USDA and AFIA audits ensure the strict regulations of all certifications are upheld.

Facility Certification Institute

Ensures proteins used in feed ingredients exceed quality standards and are free of restricted-use protein products (RUPP), which are found in ruminant animal byproducts.

American Feed Industry Association

Safe Feed/Safe Food was created to recognize companies demonstrating their pledge to deliver safe and wholesome feed ingredients while enhancing customer confidence in their products.
